# Data Privacy

## CREATE STRONG PASSWORDS.

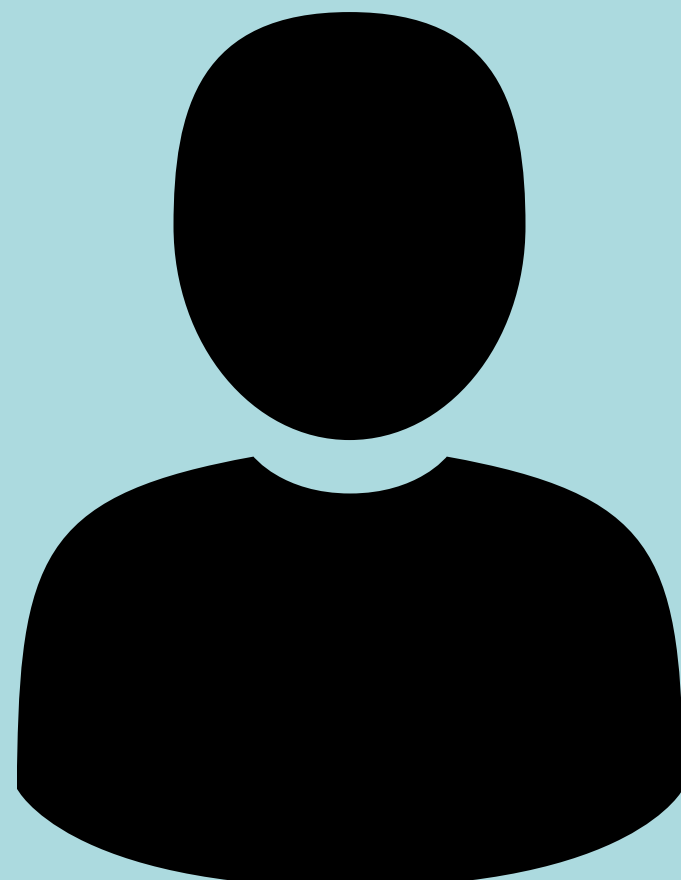

Use passwords that are hard to guess, and keep track of it using a password manager.

A typical good password contains uppercase and lowercase character, and numbers and special characters. The length of your characters should not be less than 8.

Change your  
password  
once every  
month.

Else you may leak  
information

Check if your  
password is leaked!

when you're online!

## BE CAREFUL OF WHAT YOU DOWNLOAD.

Don't download content from sites that are not trustworthy.  
These may contain malware.  
Sites that contains a lot of advertisement, and pop-ons  
should be avoided.

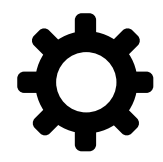

Be careful on  
torrent sites

You may get  
trojan inside

Check source  
before download
